

The Background

City taxis are one of the largest taxi company's within Sheffield, with their 960 drivers carrying out more than 75 thousand journeys per week and combined, travel the equivalent of 10 world round trips!

Installing solar on the city centre property was never going to be on a small scale and with such big claims we needed to make sure we installed a system that would deliver big savings.

The Installation

- 1 x 49.5 KW Solar Photovoltaics system
- 198 x Canadian Panels
- 4 x invertors
- 1 x generation Meter

The Benefits

- Annual out put was estimated at 44,154 Kwh
- Producing FIT payments of £5,355.88
- Estimated total system benefits of £8,947.80
- System payback of approx. 7 years
