

# Hollyseat Farm, Belper

## The Background

Hollyseat Farm is a property owned by the Chatsworth Settlement of Trustees, and is part of the Chatsworth Estate. It had an oil boiler that was expensive and unreliable. As part of a Greener Chatsworth, they decided to replace the oil boiler with a renewable heating system. We installed a 32KW pellet boiler at the property. By doing this we have reduced the fuel costs and CO2 emissions.

## The Installation

- ETA PC-32KW Pellet Boiler
- 1000ltr Buffer tank
- ETA Control System
- Self built fuel store

## The Benefits

- Annual Fuel savings- £1794
- Reduction in CO2 emissions— 24 tonnes
- Payback period- 5 years
