

Top Farm, Chesterfield

The Background

Top Farm is owned by Chatsworth Settlement Trustees. It was identified as one of the properties owned by the estate, that required the current oil system to be upgraded, and a renewable energy system be installed, as part of a 'Greener Chatsworth'. We did this by installing a 32kW pellet biomass boiler, along with a nine tonne ETA fuel store, located in the adjacent buildings.

The Biomass Installation

- ETA PC32 KW Biomass Boiler
- 1000ltr ETA Buffer Tank
- ETA Box 29 Fuel store.

The Background

- Annual fuel savings of £ 1258
- CO2 Reduction of 17 tonnes
- Payback period of 4 years.
